Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/19/2007 has been entered.
2. Due to amendments and persuasive arguments by applicant, the previous rejections of record based on Vesperini et al. have been overcome and are hereby withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 27-40, 42 and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Lahanas et al. or Kellner et al.

Response to Arguments

5. Applicant's arguments filed 10/19/2007 have been fully considered but they are not persuasive.

6. Regarding Lahanas et al., applicant argues that the reference "fails to disclose adding a fatty phase to a gelled aqueous phase". However, the teaching in Lahanas et al. to add the fatty phase, comprising the oil and the perfluoropolyether, to the water-in-silicon emulsion, comprising the gelled aqueous phase, still meets the requirements of the present claims.

Even though applicant has amended the preamble to recite that the process is intended to prepare a composition "consisting of" a fatty external phase and a gelled aqueous phase, the actual process steps in the claimed process still recite "comprising" and are open the additional steps, including possible removal of components in order to form the final product.

Thus, the requirements for rejection are still met.

7. Regarding the water-in-oil emulsion, when the oil/fatty phase is added, the composition formed in Lahanas et al. comprises a fatty external phase and a gelled aqueous internal phase.

Further, the newly added step of forming a water-in-oil emulsion "having" said fatty external phase and said gelled internal phase step, does not exclude the presence of other phases in the step.

Applicant is reminded that the independent claims are drawn to the process, not an intended product.

8. Regarding Kellner et al., again applicant argues that, while the reference discloses water-in-oil emulsions, the only exemplified embodiment is an oil-in-water emulsion. However, it is well settled that anticipatory teachings are not limited to any particular embodiment/example. In re Boe, 148 USPQ 507 (CCPA 1966). Disclosed examples and preferred embodiments (even if the embodiments tested by appellant were preferred) do not constitute a teaching away from a broader disclosure. In re Susi, 440 F.2d 442, 169 USPQ 423 (CCPA 1971). The claimed process is still taught by Kellner et al., even if not exemplified.

9. Again, applicant is reminded that the claims are to a process, and not to "a composition comprising of a fatty external phase and a gelled aqueous internal phase". Regarding the ratio of the gelled aqueous phase to the fatty phase, in the abstract, Kellner et al. teaches 5-95% of the aqueous phase, based on the water and oil phase composition.
